Meridian Chartware

Making navigation simpler, safer, quicker, and more accurate

FAQ: How do I remove Meridian registry settings?

You are advised not to play with any of your registry settings unless you are a competent computer user and know what you are doing.

Please make sure that you follow these instructions very carefully. Meridian does not accept responsibility for any problems caused by incorectly following these instructions.

- Click on the MS Windows “Start” button.
- Type “regedit” into the “Start Search” field (in Windows 7 or Vista) or into the “Run” utility on Windows XP or older systems.
- SEAtrak UK customers should navigate to “HKEY_CURRENT_USER>Software>Meridian Chartware Limited” and delete the entire “Meridian Chartware Limited” folder by selecting it and choosing delete form the right click menu (alternatively just delete the sub-directories you deem necessary).
- Imray IDC customers should navigate to “HKEY_CURRENT_USER>Software>Imray” and delete the entire “Imray” folder by selecting it and choosing delete form the right click menu (alternatively just delete the sub-directories you deem necessary).
- SEAtrak ARCS customers should navigate to “HKEY_CURRENT_USER>Software>VB and VBA Program Settings>Meridian” and delete the entire “Meridian” folder by selecting it and choosing delete form the right click menu (alternatively just delete the sub-directories you deem necessary).
